**CLAYTON CORPORATIONS**

Clayton Corporations strong history in aerosol innovation is well documented. Clayton invented the whipped cream valve, cheese valve, polyurethane foam valve and icing valves earning the status as a world leader in dispensing viscous and foaming products. Our product portfolio also includes pistons and bag on valve solutions. Our R&D efforts have been bolstered by our investments in people and technology to allow us to rapidly design and prototype new aerosol dispensing solutions. Clayton has world class manufacturing operations which include molding, stamping and assembly functions. We hold an excellent level certification through SQF (Safe Quality Food) and are listed in IMS (Interstate Milk Shippers). Our strong innovation, enhanced R&D technologies and superior service enable Clayton to help you expand your existing markets or capture new ones. See what the NEW Clayton can do for you.
