Den Hartogh Gas Logistics B.V.

Den Hartogh Gas Logistics specialises in safe transport of liquefied gases globally. The company has one of the largest gas fleets in the world and delivers supply chain solutions for cryogenic and compressed gases.

Den Hartogh Gas Logistics has a wide variety of services; transport of gases inbound and outbound, stock management, leasing of equipment, fleet management, technical support, temporary storage and tailor made answers on dedicated basis. We handle a wide variety of products and that makes us specialists in a lot of markets. Each market asks for its specific solution and they have all their own dynamics and characteristics. That is why we go into detail with our customers in order to secure safe on-time deliveries.

Den Hartogh is constantly aware of all the changes in the gas market and the company adapts to the needs of the customers. We are agile and motivated to make it work for you. Customers appreciate the dedication of the local teams with their extended expertise of gas supply chains and equipment.
