ELYSEE COSMETIQUES

Elysée Cosmétiques is a European leader in cosmetic aerosol filling. The company which has today around 150 employees was initially created in 1995 by the Giesen family (MAXIM GROUP) in Forbach, 57, France.

More than a filler partner, Elysée Cosmétiques offers to you a 360° partnership throughout all your project : response to customer and marketing briefs, presentation of innovation trends and reviews, research and creation of packaging, R&D solutions, specialist in the production of classic and bag on valve aerosols, logistical and regulatory support. Since 1995, our laboratory has been at your disposal to create and develop innovative formulas. To date, more than 5,000 formulas have been created in the R&D department. Each day we invent the aerosols of tomorrow : deodorants, dry shampoos, watersprays, shaving products, sun protection, body care products, hair sprays and styling mousses, etc ...
