ENDURA SPA

Endura SpA is specialized in the field of synergists, active ingredients and repellants for household insecticides, PCO and vector control applications. It is the largest worldwide producer of the synergist PBO also offering a wide range of synthetic pyrethroids and natural Pyrethrum thanks to partnership with the Rwandan Horizon Sopyrwa. The patented, synthetic process to manufacture PBO, for which Endura has received numerous Italian and international awards for the environment, has created opportunities for more extensive applications in a number of fields, among which vector control and in agriculture as a resistance breaker. PBO is also manufactured according to GMP standards to allow for its use in veterinary and human applications. Endura SpA operates internationally selling in over 60 countries and holding registrations worldwide and has an historically partnerships with the Chinese company Jingsu Yangnong Chemicals Ltd. Endura SpA adheres to the principles of Responsible Care® and is UNI ISO 9001:2008, UNI EN ISO 14001:2004, OHSAS 18001:2007 and ISO 50001:2011 certified.
