IGS GeboJagama

IGS GeboJagama is a manufacturer of high precision tools for the plastics injection moulding industry. The company has a heritage of more than 65 years of craftsmanship. Due to their competences and experiences IGS has a strong focus on three markets, which are Healthcare (Drug delivery devices and diagnostics), Optical (Contact lenses and optics in general) and Packaging (Aerosols, Medical Packaging and Caps & Closures).

IGS moulds distinguish themselves because of their accuracy and durability. These long-lasting tools can only be made because of the company's knowhow, machinery and people.

The company is based in Eindhoven, The Netherlands, but the customers are spread out over the world.
