JagoPro Sp. z o.o.

JagoPro with it's over 25 Years' experience in design, development and implementation of aerosol technology, build strong position in production of medical devices, cosmetic and household goods. We offer wide range of products, over 120 million units capacity, technology of classic aerosols with different propellants, BOV, gels and liquids, know-how and highest quality standards for Private Label and Contract Filling Clients. You are welcome to contact us.

OUR PRODUCTION CAPABILITIES

Thanks to permanent process of investment in technology, modernization and expansion of our machines park JagoPro's production capacity reaches 120 million of units annually.

We are able to produce aerosols in can diameter from 22 to 66 mm, volumes from 9 ml to 750 ml are in our standard offer. Moreover we are proud about Bag on Valve technology applied and developed in JagoPro. Wide range of products are possible to pack into BoV from 30 ml up to 400 ml.

Non aerosol products as liquids, creams, emulsions or gels we are able to pack into plastic jars and tubes, plastic bottles with pumps or more and more popular snap-on packaging.

Whole production range cosmetics and medical devices you can find into our presentation. Link to presentation you can find in QR code in the corner below.

HISTORY

We started our adventure with aerosols in 1993. At the very beginning JagoPro was focused on simple aerosol products like air fresheners, deodorants, hairsprays. We have come a long way to become a leading European aerosol manufacturer. Our policy is to invest in modern technology and trainings of our staff. We believe that constant development gives us market advantage.

We focus on innovation.
We keep searching for new solutions and new trends.

Quality certificates: ISO 9001; ISO 14001; ISO 13485; ISO 22716 (GMP); EMAS; BS OHSAS 18001:2007.

we think outside the box
can

...so you *can*
let your medical device **imagination**
run wild!
